

13) VB Program using List Box and Combo Box Control

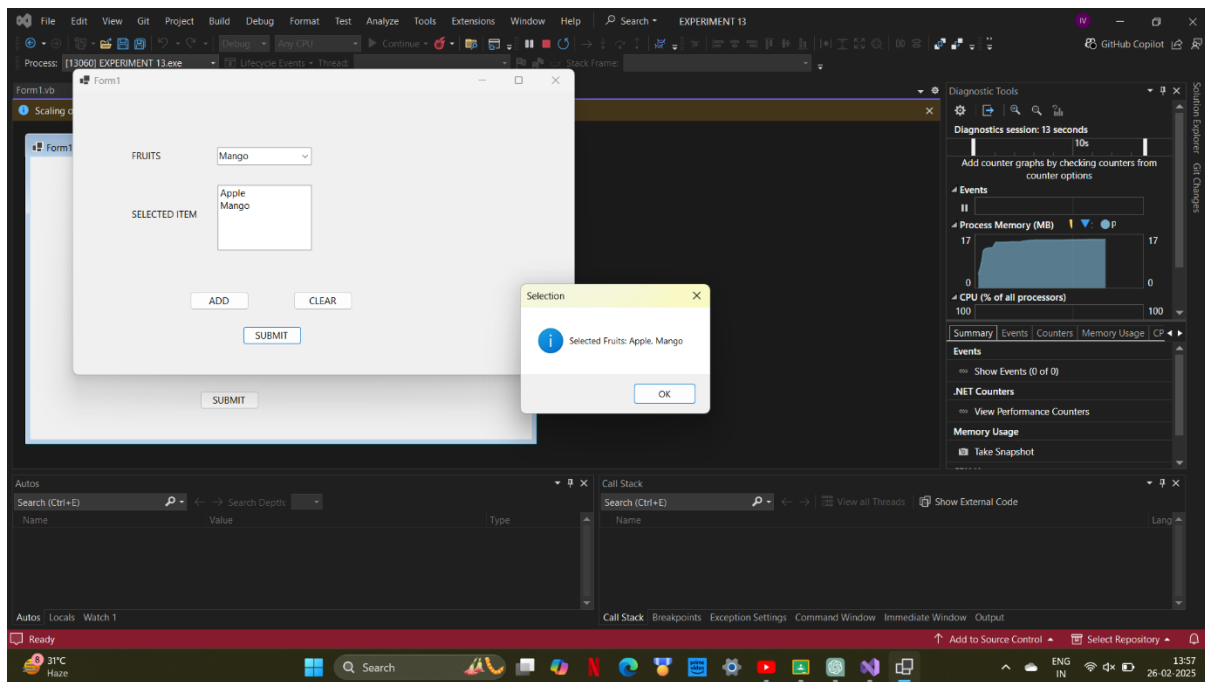

Aim:

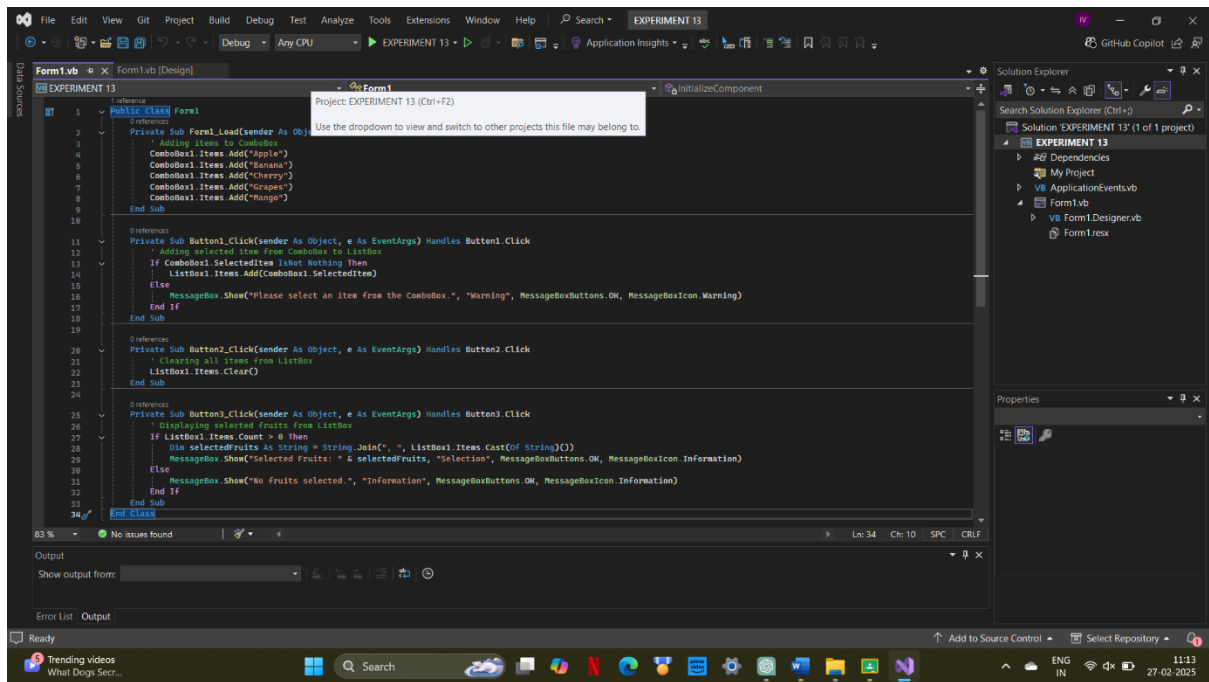

To implement a Visual Basic program that transfers selected items from a ListBox to a ComboBox using a command button.

Procedure:

1. Create a new VB project.
2. Add:
 - A **ListBox** (List1).
 - A **ComboBox** (Combo1).
 - A **Command Button** to transfer selected data from ListBox to ComboBox.
3. Add items to the ListBox in the Form_Load event:
4. Add this code to the Command Button:

OUTPUT:

RESULT:

When an item is selected from the ListBox and the button is clicked, it gets added to the ComboBox.
