

EXPERIMENT 19

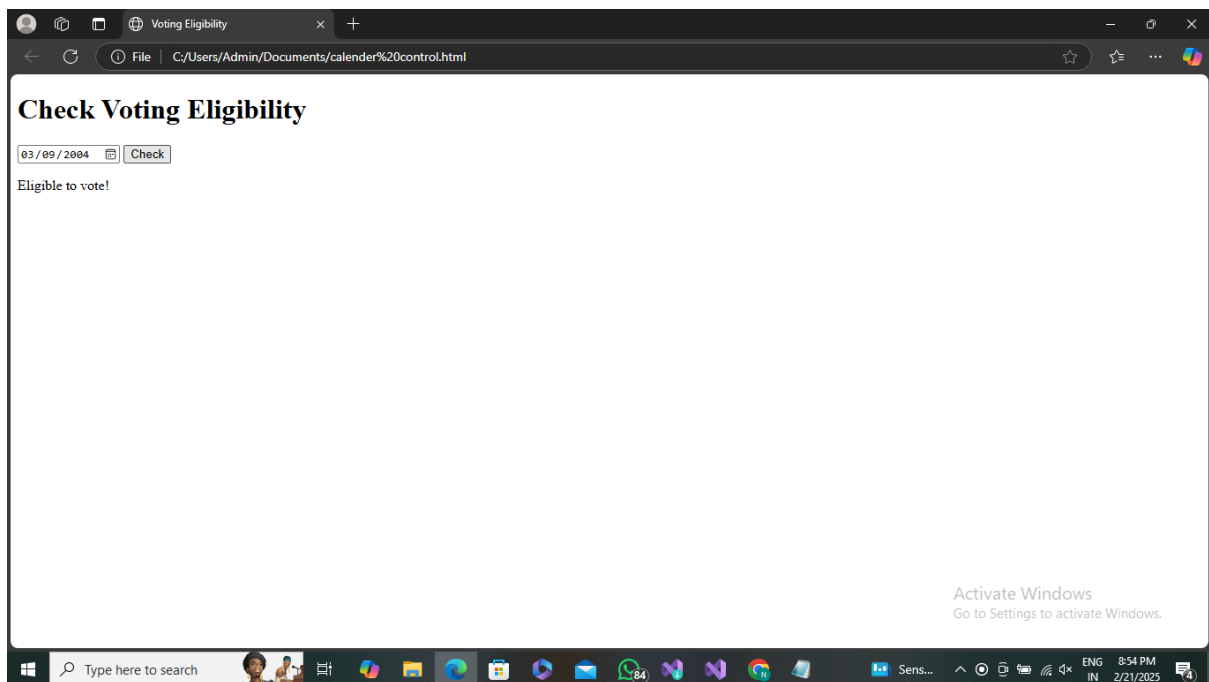

Aim:

To use a **Calendar Control** in ASP.NET to check whether a user is eligible for voting based on their birthdate.

Procedure:

1. Open **Visual Studio** and add a new **Web Form (WebForm1.aspx)**.
2. Add a **Calendar Control** and a **Label** to display the eligibility status.
3. Write a function to calculate age when a date is selected in the calendar.
4. If the age is **18 or above**, display “Eligible”, otherwise “Not Eligible”.
5. Run the project and test with different birthdates.

Output:

Result:

A Calendar Control was successfully implemented to check voting eligibility based on the user's date of birth.
