

EXPERIMENT 30

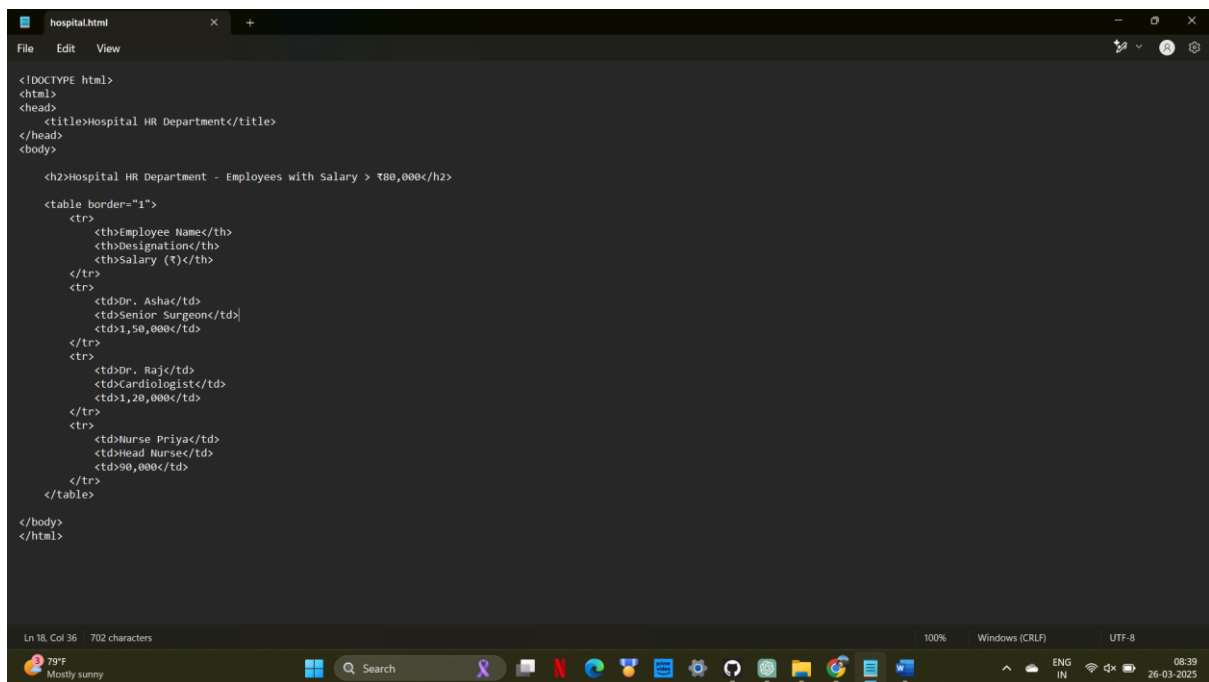

Aim:

To create a **hospital HR system** that filters employees with salaries above ₹80,000 and displays them in a **Data Grid Control**.

Procedure:

1. Create a **SQL database** with an Employees table (EmployeeID, Name, Designation, Salary).
2. Add a **GridView control** in **WebForm1.aspx**.
3. Write a **SQL query** to fetch records where Salary > 80,000.
4. Use **ADO.NET** to bind data to the GridView.
5. Run the project and verify the filtered salary details.

Output:

```
<!DOCTYPE html>
<html>
<head>
<title>Hospital HR Department</title>
</head>
<body>

<h2>Hospital HR Department - Employees with Salary > ₹80,000</h2>

<table border="1">
<tr>
<th>Employee Name</th>
<th>Designation</th>
<th>Salary (₹)</th>
</tr>
<tr>
<td>Dr. Asha</td>
<td>Senior Surgeon</td>
<td>1,50,000</td>
</tr>
<tr>
<td>Dr. Raj</td>
<td>Cardiologist</td>
<td>1,20,000</td>
</tr>
<tr>
<td>Nurse Priya</td>
<td>Head Nurse</td>
<td>90,000</td>
</tr>
</table>

</body>
</html>
```

Hospital HR Department - Employees with Salary > ₹80,000

| Employee Name | Designation | Salary (₹) |
|---------------|----------------|------------|
| Dr. Asha | Senior Surgeon | 1,50,000 |
| Dr. Raj | Cardiologist | 1,20,000 |
| Nurse Priya | Head Nurse | 90,000 |

Result:

A **hospital HR system** was successfully developed to display employees earning more than ₹80,000.
